

SMARTER CLOUD TELEPHONY

Introducing AutoDealerIQ™

The smart, unified communications platform created especially for single and multi-location Auto Dealerships. With AutoDealerIQ you get the flexibility and features you need to empower your team to supercharge productivity and increase revenue. The advanced routing features, and disaster prevention capability of AutoDealerIQ’s proprietary Smart Edge Controller ensures that your Dealership will keep communicating at all times.

AutoDealerIQ Features

- Ring All: Calls to the salespersons Direct Line or extension can be configured to “simul-ring” their cellphone or other extensions, resulting in zero missed calls, and more sales revenue
- Private Conference Bridge for EVERY extension: Conference in sales, the customer, the insurance company and F&I staff, using only a single phone line!
- Softphone with headset included: Sales can now tele-market from their laptop, desktop or tablet from anywhere
- Keep your phone number: Sales & Staff can move from one location to another, taking their Direct Line with them. No need to request a change from IT. With AutoDealerIQ, take your phone OR we move the number for you remotely
- Remotely managed moves, adds, and changes, done in minutes, not days
- Easy to deploy, configure, and scale as your business grows
- Phones are delivered pre-programmed, ready to use out of the box

The AutoDealerIQ Difference

- 30-50% lower cost to operate vs premise-based equipment
- Unique direct phone lines or extensions for each user on the system. Calls can bypass main reception and go directly to the salesperson, finance, or service
- Advanced call routing: No need for sales staff to give customers their private cell number, their Direct Line rings their extension and mobile at the same time, and can be routed to other extensions, locations and departments if unavailable
- Desk phones can be ordered to work wirelessly. Allowing relocation anywhere a WiFi signal is available. Just pick up your desk phone and start communicating
